The key word is **Longevity**

- `www.softwareheritage.org`
- Archival of *Source Code*
 - GitHub, GitLab, BitBucket, ...
 - PyPI, NPM, Guix, Nix, ...
- since 2015/2016 (INRIA)
- Supported by UNESCO
- Jul. 24:
 - 301 Millions of projects
 - 4 Billions of commits
 - 19 Billions of files

Software Heritage

Demo Time!

```
\usepackage[                @softwarerevision{lb4omp,
  datamodel=software, title = {{LB4OMP}},
]{biblatex}                 author = {{DMI-HPC Group}},
\usepackage{                year = {2021},
  software-biblatex         url = {https://github.com/unibas-dmi-hpc/LB4OMP},
}                             version = {0.1},
% ...                         swhid = {
LB4OMP \cite{lb4omp}        swh:1:rev:60e73ee93dccee745603fdc65825cbfa5130f4e9
}                             },
}
```

LB4OMP [1]

References

- [1] [SW Rel.] DMI-HPC Group, *LB4OMP* version 0.1, 2021. URL: <https://github.com/unibas-dmi-hpc/LB4OMP>, SWHID: `<swh:1:rev:60e73ee93dcee745603fdc65825cbfa5130f4e9>`.

Conclusion

- Software Heritage
 - Long term archival of *Source Code*
 - supported by UNESCO
- Most adapted solution (as of today)
- Can easily and precisely cite software
- (sustainability?)
